Experiment-2

Program:

```
import cv2
import numpy as np
import matplotlib.pyplot as plt

img = cv2.imread('A_big.jpg')

rows,cols = img.shape[:2]
pts1 = np.float32([[25,25], [150,100], [100,150]])
pts2 = np.float32([[10,78], [150,100], [100,200]])

matrix = cv2.getAffineTransform(pts1, pts2)
transformed_image= cv2.warpAffine(img, matrix, (cols,rows))

img_rgb = cv2.cvtColor(img, cv2.COLOR_BGR2RGB)
affine_rgb = cv2.cvtColor(transformed_image, cv2.COLOR_BGR2RGB)
cv2.imwrite('affine_rgb.jpg', affine_rgb)

plt.subplot(1,2,1)
plt.imshow(img_rgb)
plt.title('Original Image')
plt.axis('off')

plt.subplot(1,2,2)
plt.imshow(affine_rgb)
plt.title("Affine Transformation")
plt.axis('off')

plt.show()
```

Output:
